Able Data Installations PLC

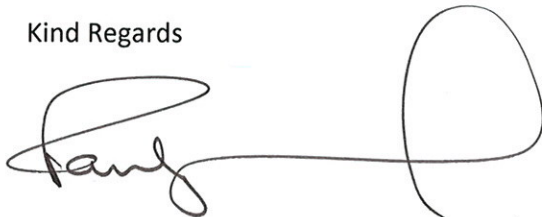

I am writing in reference to my dealings with Able Data Installations and thank you and your team for your excellent work at a prestigious bank in the City of London.

This was a project with tight timescales, but Able Data worked in an exemplary manner to meet the required schedule with no fuss or complaint. The execution of the customer's requirements has been outstanding.

Special thanks should be passed onto Shaun Barnes for his excellent project management and to Scott O'Brian for the way that works were carried out on site.

I look forward to continuing our working relationship and feel confident that all future projects will continue in the same professional manner.

Kind Regards

**Paul Mynard**

Technical Services Manager
