Dear Alex

Re: Tower Bridge House

I would like to take this opportunity to congratulate you and your team for your recent efforts in providing RPC with a first class new structured cabling system. I would also like to thank you for the way you managed the project and your standard of professionalism throughout.

Since February 2006 when the project started, Able Data have worked hard to complete all works on time to a high standard, dealing with all matters arising efficiently and with minimal fuss.

We certainly intend to carry on using Able Data in the suture and I look forward to our continuing working relationship.

Thanks once again.

Yours sincerely

JP Julie Berry
IT Director
