Location	Part of the Abbey gate Sainsbury's development, Milton Keynes	
Contract	£350K	
Systems	Fracarro IRS Equipment	
Timescales	March 2007 - November 2008	
Contractor	BAM	
Project Description	<p>Able Data were contracted to build an IRS system for the new Abbey gate Sainsbury's development in Milton Keynes.</p> <p>Over the large development, it was decided to build a separate aerial rig and head end on each main block, subdividing the project into smaller independent units. Each flat was provided with its own TV and Data patch cabinet to allow flexible re-configuration of the services.</p> <p>One of the challenges was to build temporary TV/Sat head ends to accommodate new tenants moving whilst the main development continued.</p>
