Location	Paddington, London
Contract	£300K
Systems	Brand-Rex Cat6 & OM3, Cooper B-Line Cabinets
Start & Finish	Feb – Aug 2008
Consultant	April Management
Contractor	Mastercraft Design
Project Description	<p>Misys were consolidating four regional offices into one new headquarters building.</p> <p>The new offices required 3,000 Brand Rex LSOH Cat6 outlets installed over three floors, each floor being cabled from two patch rooms. Able Data connected the patch rooms through diversely routed OM3 fibre and voice backbones. In the main computer room, Able Data installed Cooper B-Line cabinets, fitted with the Unite Hawki-2 intelligent power monitor and control products.</p> <p>Able Data also managed the movement of 500 users into the new building. Scheduled over five weekends, this included providing an asset register of all of their computer equipment and a full moves service into the new offices, including connection and test of all of the desktop equipment.</p>
